## THE MAIDEN'S CHOICE.

[A wee Sang, in the Scottlsh Dialect.] ET WM. GILL MILLS, LL. D.

Ah, me) what can I dae, noo? I'm in a mourafe' plight; 'ty bosom's fu' o' was, noo, Frae mornin' until nicht. I'm a' in sic a flurry, My heart beats like to brak : There's two woos me to marry. I scarce unnw which to sak.

There's Johnny sais I'm bonnie, And flatters me away My con's mair bright than ony That ever he yet saw. He aye tawks o' his gear, An' he will dress me braw

He does na spear ava. There's Willie says he lo'es me. a seem to him see dear; Au' mair than life he views me An' lika word's sincure. Nac fin terin' tale he tells me. Tawks no o gowden store;

His noble min compels the

To feel his luv is pure.

But for gold sense, I fear,

Noo, Johnnie he is handsome, Au' praises me up floe; An' Will ie he is winsome, An' bas a noble min'; But flattery's ave a schuner. Au' gowd's no genuine part; Sae, min' an' luy's the winner, An' While has my heart.

## How Mines are Worked.

[Bill Aye in Laramite Bocmerang.] "I wish you would tell me all about he way men get gold and suver out I a mine, my dear," said a lady in gast Larumte the other evening to her usband, as he peried off his cont and at down in turee chairs for the even-

Well, what kind of mining do ou went to hear about-gold or sitver, quarit or placer, deposit or de-

"Well, all of them briefly. I want o know whether they scrape off the old from under the side of the ground, and wash the ditt off in the creek, or how to he?" "Well, they don't screpe off the un-

fer side of the pround caucity. There out the whole country. you are in error. In placer mining ne, have to correct the quet and part out with a gold pan." "Oh! they have to use a gold pan, aming so expensive. Does the pan

inve to be sould gold?" send, he begins to sig I rabe purpose i accertaining how extensive it to, and what it will assay."

"Out that is it. I thought they and bored more the ground with a pay stenk until they I and the shall, and hen the drift of for the assessment, on whan they terms that they Jose ut a biast in the indications and sited in comp. Now, it seems that ou don't do that way. You follow up the intenclous sinte tid you state ine tites tota. Then you see if you can had a color that marches with the opper stained trilountes; that you pros, ect, and you --- "

No, I must stop you there, you probably nave the right idea, but you are using terms that are not correct. After they get the wall of rock on the iump and pinch out the night shift, they salt the contact and blast the vertical chulblain. Then they drift for the blossom rock, baled hay and poverty till they strike the varicose vein. After that it is a short job to put on the bias folds and sample the stockholders. Where the bituminous duplex bisects the brocaded perphyry and scollops the gouge with crosseyed shirrings and blearbonate of bilious colic interlaced with moire antique wads of gray copper and free milling crystpelas. This is not always the case, however, for indigram promptly attended to. Orders can rectly or adversely, perhaps more, or so at the Government Corrst, Tucson. sometimes less, as the case may be, and still we might or might not, according to whether we aid or not, but also besides, if not always as described, perhaps, yet I wouldn't be

positive of anything which might be Then he laughed a cold, hard laugh, and went to bed. It husbands their wives, how much pleasanter papers are hardly enough for our stopped, fell down and was instantaour homes would be.

"As Isily perfecting a thorough working system," says Superintend-eat Burorage, of the Old Dominion Copper Mining Company. He writes from Globe, Arizona, April 29, as ollows: "Am opening intoes in such a manner as to make this great bomanga a solid, lif time investment." Under date of April 28 he wroes: shaft on Old Dominion will be deep enough to strike with tunnel No. 1. When shall and tunnel are connected will be assured of good air for long distance into hill. In this climate great precaution must be taken to insure a good supply of air in underground workings. Heretofore work come contagious, and unless promptly at pred during June, July and Au- checked may involve that unfortunate Governor, though Maytorena made a gust. ## ARIZONA'S WEALTH.

The mineral resources of the Terrivelous. The developments being made show such an abundance of gold and silver ore as has been never dreamed of tefore. Even those who have always felt full confidence in the mineral outcome of our Territory are astonished at the numerous wonderful developments being made. Yet the present condition of the prospective value of our resources is still in its infancy. But a fraction of the mineral-bearing portions of Arizona have as yet been prospected, and thousands of mines are to be discovered that will yield an abundance of wealth to the world, count with the best. In Northern Arizona there are large stretches of country, yet untrodden by the foot of civilized man, that are undoubtedly as well supplied with mineral leads as the best yet found. As the country is settled up, the daring prospector will find his way into the unexplored hills and reap the rich reward of wealth there awaiting him-Even about the most developed portion of our Territory but a small proportion of the mineral leads of great value has been discovered, and the advancing years will bring new developments as startling as some of the limit to the mineral resources of Arizons, and the rule that its mines inwith a confidence in their permanence that will bring ready capital to our Time will show that a better field for of the just as I justly needed. The The Delightful Weather in the Mounprofitable mining investment exists in Arizona than in Sonora, and the misour own Territory, and a legitimate

ON THE OUTER WALLS

Is Again the Proud Banner of the S. & O., and by Another Happy Stroke of Enterprise Goes to the Front.

The Baltimore and Ohio having per-

series of improvements it has been in its time schedule, to go into effect schedule the time between Chteago and the East is greatly lessened. The afternoon fast tipe, which formerly be. You, sir, may be a young man, and not posted on the ways of bubbles. This is a solid train runhe effects of an abertion, alleged to sleeping on the outside bed-rail be- more, Philadelphia and New York have been performed by Dr. B. F. cause the baby must have room, when without change of cars of any class whatever. The B & O. is the only line offering this great advantage, as venience of the entire train running through without change must be most apparent to those who have been hours of the night, and in many ways been put to no little trouble in getting their families and baggage from one train to another. There is nothing of this on the B. & O., for if one so chooses, the car that he takes in Chicago he may remain in until he reaches New York city. As all the Eastern Times run trains leaving Chicago at 5:15, it is interesting to note that the B. & O. train leaving at that hour renches Washington a whole migut in anyance of the 5:15 trains on logion via the B. & O. reach there the next evening, while by taking other lines they would not reach the national capital until the second moraing. The time from New York to Chicago is lessened an hour, the fast express being due at 7:30 instead of 8:30, as heretofore. There is no maout they are very matronly. They terial change in the departure of the like Soldone used to be in the days of | perfect manner in which they are kept for the full benefit of the mammoth cave the traveling public. The B. & O.
